To whom it may concern:

I met PF Lazor last Aug. 1982 when I was being instructed in the sport of skydiving. The instruction took place at the Livermore airport in the club house of the California Parachute Club. I was one of five people being instructed for our first jump. PF asked our instructor if he could assist her with our class. I learned later that PF was working on his instructors license. Having him there that day helped us as well as the instructor. It freed her to work with the ones that were having trouble and PF continued to run us through our drills. PF was there the next day when we made our first jump. He helped me to be less worried about the jump by answering any questions that I had. I made ten more jumps since that day during the next 3 months and had a chance to get to know PF better. I noticed that at the drop area he was always very helpful and willing to answer questions that the other jumpers had. On three occasions PF (as per requirements for jumpmaster/instructor rating) assisted my jumpmaster with my jumps. On my last jump, which was my first ten second delay, PF jumpmastered me. He did an excellent job and I felt very confident to be under his supervision. I have since stopped jumping because of the weather but look forward to next spring when jumping resumes. I would feel very comfortable at having him jumpmaster me again on future jumps.

Of the short time that I know PF I have found him to be a very considerate, helpful, likable guy. In my judgement I wish there were more people like him around. It would make coping with other people a much more pleasant experience.

Sincerely
